DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. **Claims 1-4,6-8,10-15,17-19,21 and 22** are rejected under 35 U.S.C. 102(a) as being anticipated by **Kataoka US patent 6,313,564**.

Kataoka'564 discloses a driving apparatus for vibration type actuator (5, column3,line 30-33 Fig.1), which makes driving vibration at a driving unit of a vibration member by applying an alternating signal (4, column3,line 61, a voltage generating means)to an electro-mechanical energy conversion element (5,column 3,line 35, Fig.1) and uses at least a frequency of the alternating signal (column 4,line 65) as a speed control parameter (see column 4,line 60, frequency control speed), said apparatus comprising a driving circuit capable of changing a driving voltage (4, voltage generating device inherently changing the frequency and voltage) of the alternating signal to be applied to said electro-mechanical energy conversion element (5, column 3 line 35,) and control circuit which controls said driving circuit so that at least an absolute value of a tilt of a frequency-speed characteristic of said actuator is within a desired range in a frequency band of predetermined range (see column 3,4,5).

Allowable Subject Matter

3. **Claims 5,9,16 and 20** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed 09/30/2003 have been fully considered but they are not persuasive.

5. **Kataoka'564** discloses an apparatus for controlling the frequency-speed so as to be within a predetermined range (see column 3, line 61-67), and al so **Kataoka'564** teaches to control the driving voltage of an alternating signal (see column 4 line 59-63).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
